ASSEMBLY INSTRUCTIONS:

1. Remove existing shower head from spout.
2. Screw diverter valve onto spout. (Include washer.) Be sure not to overtighten
3. Attach the hose to the bottom spout of the diverter valve.
4. Attach the Nova handheld shower to the other end of the hose as indicated in the picture (The shower head is equipped with a water saving washer so no extra washer is needed.)
5. Use the screws and mounting inserts to fasten the shower head holder bracket to the wall. (A drill may be needed for some shower wall surfaces.)
